**(54) PREPARATION OF LIPOSOME**

**(57) Abstract:**

**PURPOSE:** To prepare uniform liposome efficiently and in large amt. by hydrating liposome membrane composing substance by kneading it with a small amt. of aq. solvent at a temp. above the phase transfer temp. of the membrane composing substance.

**CONSTITUTION:** 1pt.wt. liposome membrane com-

posing substance (e.g. phosphatidyl choline) is hydrated by kneading it with ca.0.2W8pts.wt. aq. soln. (e.g. water) at a temp. above the phase transfer temp. of the membrane composing substance. Then, necessary amt. (10W1,000pts.wt.) of aq. soln. is added to the mixture, and obtd. mixture is stirred at a temp. above the phase transfer temp. of the membrane composing substance. As a result, uniform liposome is obtd. efficiently and in a large amt.
